★ SHAPE SUBTRACTION ★

- Count all the objects in the group.
- Cross out 2 objects in each group to show how many you are subtracting.
- Count how many are left and write the answer.

SCHOOL SUPPLIES SUBTRACTION

- Count all the objects in the group.
- Cross out 3 objects in each group to show how many you are subtracting.
- Count how many are left and write the answer.

VEHICLE SUBTRACTION

- Count all the objects in the group.
- Cross out 5 objects in each group to show how many you are subtracting.
- Count how many are left and write the answer.

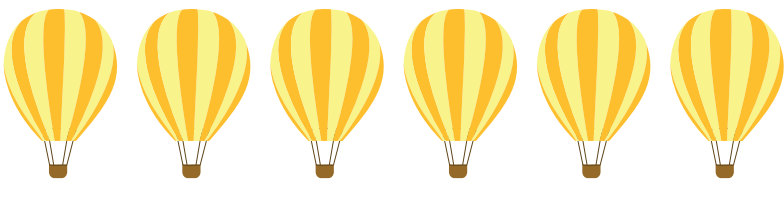

9 red cars arranged in two rows: 4 in the top row and 5 in the bottom row.

$$9 - 5 = \underline{\quad}$$

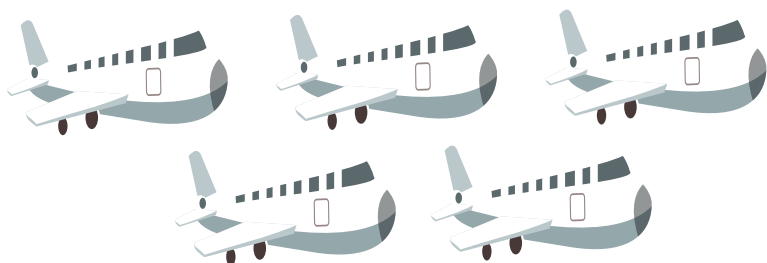

8 green SUVs arranged in three rows: 3 in the top row, 3 in the middle row, and 2 in the bottom row.

$$8 - 5 = \underline{\quad}$$

7 sailboats with orange sails arranged in two rows: 4 in the top row and 3 in the bottom row.

$$7 - 5 = \underline{\quad}$$

6 yellow and orange striped hot air balloons arranged in a single row.

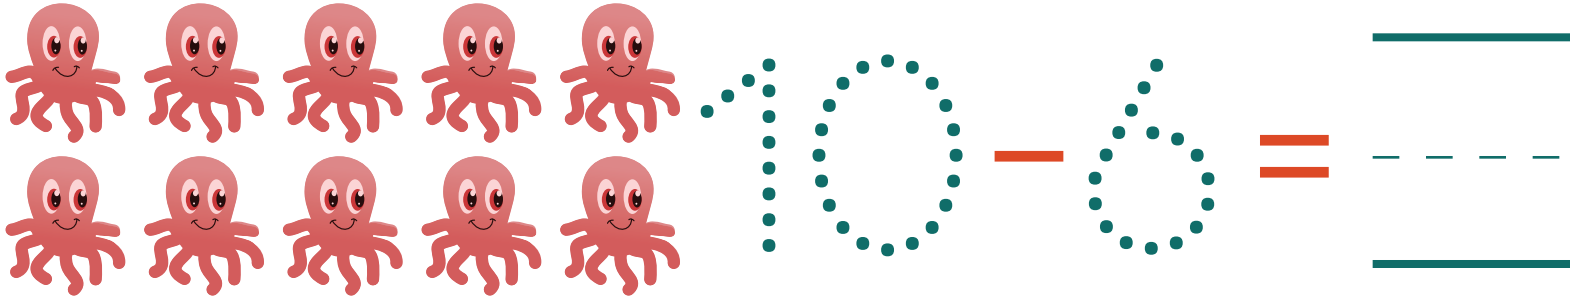

$$6 - 5 = \underline{\quad}$$

5 white and grey airplanes arranged in two rows: 3 in the top row and 2 in the bottom row.

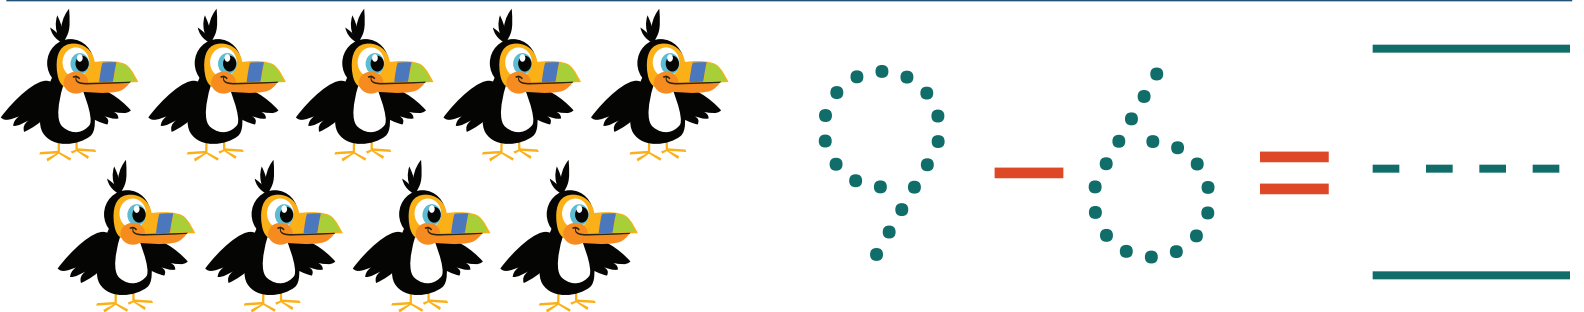

$$5 - 5 = \underline{\quad}$$

ANIMAL SUBTRACTION

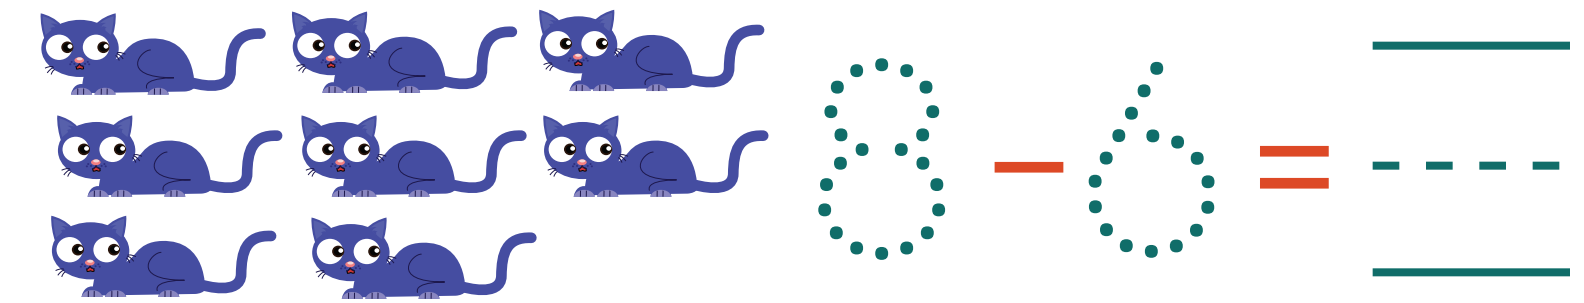

- Count all the objects in the group.
- Cross out 6 objects in each group to show how many you are subtracting.
- Count how many are left and write the answer.

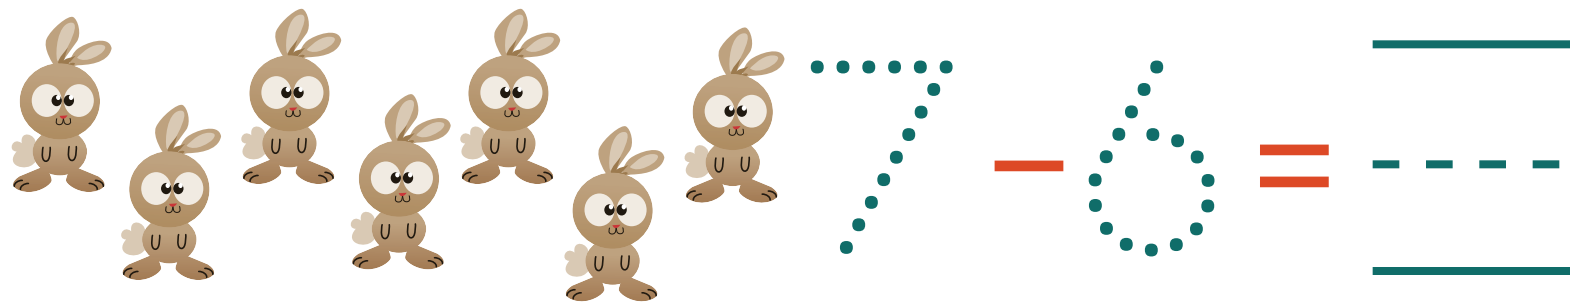

Two rows of five pink octopuses each. To the right is a subtraction problem: a circle of 10 dots minus a triangle of 6 dots, followed by an equals sign and three horizontal lines for the answer.

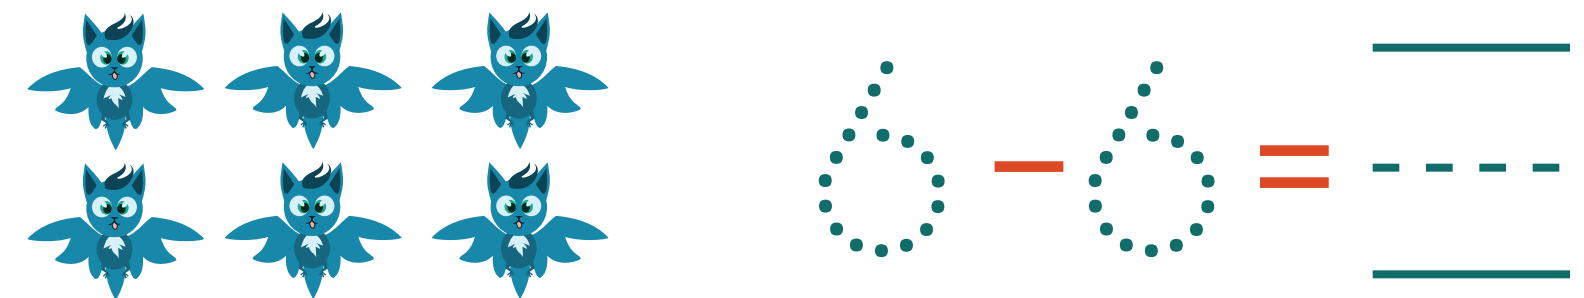

Two rows of toucans: the first row has five and the second row has four. To the right is a subtraction problem: a circle of 10 dots minus a triangle of 6 dots, followed by an equals sign and three horizontal lines for the answer.

Three rows of blue cats: the first row has three, the second row has three, and the third row has two. To the right is a subtraction problem: a circle of 10 dots minus a triangle of 6 dots, followed by an equals sign and three horizontal lines for the answer.

Two rows of brown rabbits: the first row has five and the second row has four. To the right is a subtraction problem: a circle of 10 dots minus a triangle of 6 dots, followed by an equals sign and three horizontal lines for the answer.

Two rows of blue owls: the first row has three and the second row has three. To the right is a subtraction problem: a circle of 10 dots minus a triangle of 6 dots, followed by an equals sign and three horizontal lines for the answer.

- Can you see what's in this picture?
- Let's add some color by completing the subtractions.
- If the answer is 2 color the space **orange**, 3 color it **blue**, 4 color it **green**, and if it is 5 color it **yellow**.

- Read each word problem.
- **Underline** clue words that help you know if you are supposed to add or subtract.
- Use the space under each word problem to draw out pictures to help you solve the number sentence.

If there are 3 boys playing soccer, and 2 decide to go to the playground, how many boys are left over playing soccer?

$$\square - \square = \square$$

4 girls are swimming in the pool. Then 1 girl goes to play on the grass. How many girls are left over at the pool?

$$\square - \square = \square$$

2 kids are playing basketball. Both of them decide it is time for tennis. How many kids are left over playing basketball?

$$\square - \square = \square$$

- Read each word problem.
- **Underline** clue words that help you know if you are supposed to add or subtract.
- Use the space under each word problem to draw out pictures to help you solve the number sentence.

Ben has 6 bunnies. He gave 4 away. How many bunnies are left over?

$$\square - \square = \square$$

Abi has 2 hamsters. Then 1 of them ran to the closet. How many does she have remaining?

$$\square - \square = \square$$

We had 5 pigs. Mom took 3 pigs to the farm. How many pigs are left over?

$$\square - \square = \square$$

- Read each word problem.
- **Underline** clue words that help you know if you are supposed to add or subtract.
- Use the space under each word problem to draw out pictures to help you solve the number sentence.

4 bees were flying about. 2 went to make honey. How many bees are there remaining?

$$\square - \square = \square$$

7 caterpillars were eating leaves. 3 turned into butterflies. How many caterpillars are left over?

$$\square - \square = \square$$

8 ladybugs were playing with paint. Then six painted their wings purple. How many red ladybugs are left over?

$$\square - \square = \square$$
